TOTAL	141.72	

Gross source pages - total number of source language pages sent to translation where number of pages = number of characters without spaces divided by 1500.

Net translation pages - workload assessment per target language calculated based on the potentially reusable segments from Euramis. A different multiplication factor is applied to each segment depending on the segment match rate, as defined in the Retrieval TMX. The multiplication factors are: 0.05 for 100% matches, 0.1 for 95-99%, 0.3 for 82-94% and 1 for segments with match rates below 82%.
